

Oil & Gas Sealing Solutions

The Right Seal, the First Time

Your Reliable Source for Oil & Gas Seals

H&D understands that even one drilling delay waiting for a seal can be catastrophic to your bottom line. With over 50% of our professional employees being degreed engineers, we are equipped to evaluate the application and source the right seal at the right price to endure the most extreme environments.

Oil & Gas Sealing Services to Drive ROI

- Evaluations of your existing seals for replacement or improvement
- Design and manufacturing of custom-molded and machined parts
- Customer-specific seal kits with standard overnight shipping
- Sourcing even the most difficult-to-find seals with quick turnaround

Durable Seals for Oil & Gas Conditions

- Frac pump and mud pump seals (D-rings, valve inserts, pump packing)
- Wellhead seals, S- and FS-seals, casing hanger, packoff seals
- Vee packing and stem packing
- O-rings and backup rings
- Hammer union and plug valve seals
- High-pressure swivel and RCD seals
- Chemical injection pump seals
- Gate valve seat seals
- Annular and ram BOP seals and components

Your Satisfaction Is Our Ultimate Goal

We take pride in going the extra mile to ensure your satisfaction, delivering personal and timely responses to your product and customer service needs.

Accuracy

We understand that inaccuracy in product delivery can lead to costly downtime, which is why we have quality systems in place to ensure the accuracy and quality of all our products and services.

Access

A large, in-stock inventory of seals and seal kits and long-standing relationships with top-of-the-line, global suppliers enables the fastest access to the highest-quality oil and gas seals.

Expertise

Our engineers are experts in oil and gas who pride themselves on collaboration, innovation, and exceptional service to solve your most pressing sealing challenges.

H&D proudly serves the hydraulic, oil and gas, semiconductor, and other industries.
