

Blowout Preventers

Blowout Preventer Seals Stop Costly and Dangerous Uncontrolled BOP Failure

Just a single oil or natural gas blowout can threaten employee safety, delay production, and devastate your bottom line. But, H&D can help you prevent BOP failure with our proven BOP seals and seal kits.

Blowout Preventers

Backed by Countless Hours of Testing & R&D

Our staff engineers are trained to evaluate your BOP needs to create unique, customized solutions. We assess the seal size and material requirements needed to maintain safety of employees and longevity of equipment. Plus, many H&D seals are OEM tested and approved per your requirements.

Features & Benefits

- Over 20 years of experience designing, producing, and sourcing BOP seals
- Backed by a team of engineers and sealing specialists who are experts in seal analysis, material selection, and more
- Increase options with numerous seals and kits available for a variety of BOP applications
