

Chemical Injection Pump Seals

Minimize Downtime Concerns while Improving Productivity

H&D understands that your chemical injection pump performance is key to maintaining flow and managing corrosion. With H&D, you can count on a timely response, quality materials, and personal commitment to exceeding your sealing expectations.

Chemical Injection Pump Seals

Putting Decades of Combined Experience to Work for You

Our 45-plus years of combined engineering experience gives us a deep understanding of chemical injection pump applications. We work with you to identify custom solutions for your specific needs.

Features & Benefits

- Enhance performance via high-quality materials
- Improve lead time thanks to a robust in-stock inventory of most chemical injection pump seals
- Maximize performance via customizable configurations
- Backed by decades of engineering expertise with a technical team well-versed in chemical injection pump applications

Materials

- PTFE (Teflon®) – various fillers available
- UHMW
- FKM (Viton®)
- FKM (Viton®) ETP Extreme
- FKM – fabric reinforced
- NBR (Nitrile, Buna-N)
- NBR – fabric reinforced
- FEPM (TFE/P, AFLAS®)
- PEEK
- 304/316 SS, Elgiloy, Inconel spring materials

Products

- Loaded U-cups
- Vee sets
- Spring-energized seals
- Z-seals
- O-Rings and backups

Applications

- High-pressure applications
- Low-pressure applications
- Extreme temperatures

CONTACT US

Whether it's a new solution or a quick turnaround for a proven product, let us help you find the most cost-effective seal options for your chemical injection pump needs.
