

# Engineered Sealing Solutions

Sealing the Deal on Accuracy & Effectiveness

From static applications to your most dynamic seal needs, H&D can engineer your custom sealing solution to prevent leaks, keep contaminants out, and extend the life of your equipment without sacrificing lead times or breaking your budget.

# Engineered Sealing Solutions

## Meeting Your Needs Expertly, Accurately & on Time

Over half of our team are trained engineers with the technical proficiency to improve seal life and reduce long-term costs. We work with your team to ensure the right materials are sourced for the right job, before we engineer and manufacture your sealing solution.

## Features & Benefits

- Improve lead times thanks to an unmatched inventory of top-of-the-line materials through our industry-leading suppliers
- Backed by redundant failure analysis and testing to ensure your solution stands the test of time
- Reduce troubleshooting costs and overhead via seals that are engineered to work when and where you need them
- Get unmatched tooling costs without sacrificing durability or quality

## Materials

- NBR
- Fluorocarbon (FKM, Viton®)
- Perfluoroelastomers (FFKM)
- PTFE (Teflon®)
- PEEK
- Urethane
- Additional materials available upon request
