

# Seal Kits

**Reduce Labor Costs & Downtime**

---

From downhole tools, to construction equipment, to your specific industrial pump and motor needs, H&D understands that every seal kit requires a unique “recipe” of components not always available off the shelf. Let us take this task off your plate and customize the right seal kit for your application.

# Seal Kits

## Backed by a Robust Seal Inventory to Save You Time & Money

Quit wasting time managing seal inventory and let H&D nail down the exact seal combination for your tool needs at an affordable price. We can easily customize your kit packaging, labeling, part number system, and bar coding so your employees can focus on serving your customers.

## Features & Benefits

- Proper seal selections by engineers who have a deep understanding of all available seal profiles and materials
- Professionally-styled kits for discerning customers with easy-to-read labels to avoid second guessing seal components
- Peace of mind knowing you won't run out of a particular seal kit when tools are waiting for redress
- Reduce time and labor spent determining weekly inventory demand and assembling and packaging each kit

## Applications

- Industrial kits
- Construction kits
- Telescopic kits
- Oil field kits
- O-ring kits (flange/splice/face)
- Backup and retaining ring kits
- Grease fitting kits
- A variety of custom pump, valve, and motor kits

## Materials

- NBR
- Fluoroelastomer (FKM, Viton®)
- Perfluoroelastomer (FFKM)
- PTFE (Teflon®)
- PEEK
- Urethane
- Additional materials available upon request
