

# Valve Seals

Extend Valve Life & Increase ROI

From durable check valves to superior relief and control, H&D has decades of experience choosing the right seal at the right price to safeguard your equipment and prevent unnecessary wear and tear.

# Valve Seals

## Your Valves Deserve Superior Protection

H&D understands that longer valve seal life means less preventative maintenance, which results in higher ROI. With our enormous seal inventory, we can quickly and cost-effectively source the right option to extend the life of your valve components.

## Features & Benefits

- Improve longevity and functionality for valve seals and packing
- Increase ROI with fewer replacements and longer intervals between required maintenance
- Backed by a professional staff with more than 20 years of experience choosing the most appropriate material for each valve function
- Shorter lead times with a robust selection of valve seals available when and where you need them

## Materials

- PTFE (Teflon®)
- Fluorocarbon (FKM, Viton®)
- NBR (Nitrile, Buna-N)
- HNBR
- PEEK
- Inconel
- Stainless steel
- Elgiloy

## Products

- Gate valve seals (FC and FLS or similar)
- Stem packing (U-packing and spring energized seals)
- Face seals/body bushing
- Plug valve seals
- A20 and A35 directional control valves

## CONTACT US

Let us help you reduce lead time and maintenance expenses by finding the right valve seal, the first time.
